## **ACRYLITE® FF Crystal Ice acrylic sheet**

A continuously manufactured frosted acrylic sheet

### ***What is ACRYLITE FF Crystal Ice sheet?***

ACRYLITE FF Crystal Ice acrylic sheet is the newest addition to CYRO's extensive line of sheet products designed specifically for the P-O-P and store fixture display markets. This sheet has a frosted texture similar to the texture of ACRYLITE® GP P-95 acrylic sheet. However, ACRYLITE FF Crystal Ice sheet is a continuously manufactured acrylic sheet using the same proprietary technology that is used to manufacture CYRO's ACRYLITE® FF acrylic sheet.

### ***Application...***

ACRYLITE FF Crystal Ice sheet was designed for the P-O-P and store fixture display market. It provides designers and manufacturers an acrylic sheet with the appearance of etched glass, but with the ease of fabrication, beauty, and consistent high performance expected from ACRYLITE FF sheet.

### ***Product offering...***

ACRYLITE FF Crystal Ice sheet is available in four thicknesses: 0.118", 0.177", 0.236", and 0.354" and two colors: 0917-8 clear edge and 5169-8 glass green edge. The standard sheet size is 49" x 97". Plain white paper masking is applied to the textured side. Printed brown paper masking is applied to the non-textured side.

### ***Fabrication...***

ACRYLITE FF Crystal Ice sheet can be fabricated in the same manner as ACRYLITE FF sheet. In addition, ACRYLITE FF Crystal Ice sheet offers unique benefits over conventional P-95 cell cast sheet and etched glass.

- The textured surface of ACRYLITE FF Crystal Ice sheet resists finger print marks from handling and has an easy to clean surface.
- ACRYLITE FF Crystal Ice sheet can be line bent with little change in appearance of the texture.
- ACRYLITE FF Crystal Ice sheet can be easily cemented with standard methylene chloride based cements. A strong cemented joint can be achieved when cementing to the textured surface of ACRYLITE FF Crystal Ice sheet.
- ACRYLITE FF Crystal Ice sheet edges can be flame polished while maintaining surface texture.
